

TURNING WASTE INTO SOIL

FOOD/ORGANIC WASTE COLLECTION IN HARRISVILLE

Elm City Compost is a grassroots company dedicated to providing an affordable and sustainable waste management system for the Monadnock Region.

OPTION #1

EXPAND REMOTE DROP OFF SITE

Elm City Compost already offers a remote drop off option for customers within the area. Adding another location in Harrisville would allow for residents to sign up for drop off services in the town.

Bins would be located in an accessible location within Harrisville (TBD) where customers would bring up to 5 gallons of food/organic waste a week. All the bins would be locked and residents would pay a monthly fee to access the bins for this services.

OPTION #2

ADD COMPOST TO TRANSFER STATION

Elm City Compost could potentially partner with the Harrisville transfer station to provide free compost collection. This would be of cost to the town and would take community engagement to accomplish.

Ideally the costs of this service would be offset by the savings from reduced landfill hauling needed for the town.

Of course these are just some initial options. Please reach out to us at elmcitycompost.com or email us at elmcitycompost@gmail.com with any questions or comments.
